and TypeScript
```

About experience

I gained experience in building a high-quality project from scratch, participated in an open source project, which also had a very good effect on my experience. Gained experience of working in a large team and alone, or in a team with a frontend developer. I have experience teaching children of different ages to the level of a junior trainee, therefore I can conduct good code reviews on github.

NiceCode - Junior Python Web Developer. Jan 2021 - Aug 2021

- Creating DevOps-Chat-Bots for company, like "System Checker Bot", it check server stats, database dumps, web-site availability, deploy statistic-system using Grafana, Prometheus and Django
- Scraping data and parsing

- Working with Django REST Framework in Project RE-Life - Web Application about rehabilitation center

Supplar Middle Python Web Developer. Aug 2021 - Now

Outsource project
Build RESTful API, backend from zero for mobile application. This is an application for automatically generating a diet for a variety of parameters, for example, monthly budget, calories, proteins, fats, carbohydrates. A database with a variety of recipes, prices for products that we receive via API, the ability to order products through an employee's company

Corpberry Middle Python Web Developer. Oct 2021 - Mar 2022

- Creating API, databases design, Working with AWS S3-Buckets, write scripts to manage data, analyze, and deploy in storage, using pandas, gsheets-api etc.
- Write tests for every feature in different projects, worked with someone else's code and fix their bugs.
- Create scraper and parser
- Sometimes make frontend-part, using ReactJS, Material-UI / Bootstrap. Can using react-router-dom, jwt-auth in frontend-React and backend-DRF etc.

CV

Now I'm moving to live in Serbia in Belgrade. And I'm looking for good python-community in this country, in which I can freely communicate on various topics and develop together, passing on experience to each other. I have a passion for creating cool web systems, both in a relaxed environment and among other code-loving developers. Hope we get it together as soon as possible)

My Requirements:

- Full-Time/Part-Time.
- Remote job or Office in Serbia-Belgrade.
- Salary >= 1200$
